**RE: E-911 Requirements for IP-Enabled Service Providers, WC Docket
05-196
Ex Parte Comments**

Ms. Dortch:

This letter is filed due to a teleconference call The RT Group LLC had with the Wireline Competition Bureau on January 24th 2006 presenting Ex Parte Comments concerning Docket WC 05-196.

The Participants were the following:

Wireline Competition Bureau

Joe Casey, EB
Kathy Berthot, EB
Marcus Maher, WCB
Jennifer Schneider, WCB
Kirk Burgee, WCB

The RT Group LLC

Robert Turkel
James Ross

The discussion centered on a unified E911 solution The RT Group is developing using VOIP and Broadband carriers together to generate a Location Identification System called EVLA (E-911 VOIP Location Appliance). EVLA utilizes originating IP addresses and account information to accurately locate the physical location of an E-911 call and route to the appropriate PSAP.

Attached, is the presentation given.

Best Regards
